| AI-Based Web Component Generator                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Jan 2025 - May 2025 |
| <ul style="list-style-type: none"><li>Engineered an AI-powered web application that generates production-ready UI components from natural language prompts.</li><li>Utilized React, TypeScript, TailwindCSS, and WebContainers to dynamically generate and preview components directly in the browser.</li><li>Integrated Claude API to translate user instructions into semantic HTML, CSS, and React code.</li><li>Reduced UI development time by approximately 30% through automated component generation.</li></ul> |                     |
| University Feedback Analysis                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Aug 2024 - Nov 2024 |
| <ul style="list-style-type: none"><li>Created a sentiment analysis system to classify student feedback across 1,000+ responses into positive, negative, and neutral categories.</li><li>Applied text preprocessing and sentiment scoring techniques to extract insights from feedback data.</li><li>Utilized Apache Lucene and Stanford CoreNLP for natural language processing in Java.</li></ul>                                                                                                                      |                     |

## CERTIFICATES

- Azure Data Scientist Associate (DP-100) - Microsoft (2026)
- Hackathon 8.0 - CSI UPES (2024)
- Innovation Through Design - University of Sydney (Coursera 2024)
- BigQuery - Coursera (2024)
- SRIJAN Social Internship - New Mighty Grace Charitable Trust, Bangalore (2023)
- Learning How to Learn - Coursera (2022)
